BMV/eMAR Implementation in a Critical Access Hospital

Presenter: Linda Barrett

Organization: Community Hospital of Bremen, Bremen, Indiana

Abstract: Community Hospital of Bremen, a 25-bed Critical Access hospital, went live with BMV, eMAR and NUR in December 2009. Learn how they selected hardware, dealt with lack of 24/7 pharmacists, managed the handling of patient's own meds, mantoux reads and other miscellaneous items on the eMAR, including packaging non-unit dose meds and their decision to use BMV in the Emergency Department. Also included will be an overview of how they funded this project.

Linda Barrett, M.T. (ASCP) is the Vice President of Clinical Services and Information Technology for Community Hospital of Bremen. She has been with CHB for 12 years, supporting and implementing both MEDITECH clinical and non-clinical applications.
