Need More Time? Let the System Scan for You – COLDFEED

Presenter: Christie Walkup

Organization: Norman Regional Health System, Norman, Oklahoma

Abstract: IT analysts from Norman Regional Health System will reveal how the system can do the work for you rather than using a FTE to scan documents via MRM or thru POC. Attendees will discover how to use MEDITECH Specs to get forms into the ELR so staff are not making errors in selecting wrong patient id's, using valuable FTE time, and dealing with scanning equipment.

Christie Walkup has worked with Norman Regional Health Systems in Norman, Oklahoma for 20 years. She has 17 years in IT experience, with the last two years in MEDITECH, various other applications and interface systems. She was team lead and or team member for many of the implementation groups during the install of MEDITECH applications including ABS, BAR, ADM, MRI, MIS, NMI and SCA.
